

Source-Answerability and Scoped Condition Coverage Across the 404-Brand US Sweepstakes and State-Licensed Casino Inventory (2026)

Deterministic Extraction of Method-, Currency-, and Promotion-Scoped Redemption Clauses with SHA-256 Snapshot Provenance

Document-Scoped Condition Ledger: <https://casimo.org/conditions>

Abstract

We audit 404 US casino and sweepstakes brand identities to measure how many decisive pre-deposit questions (excluded states, playthrough multipliers, minimum redemption thresholds, cashout caps, processing windows, payment methods, fees, and coin expiry) can be answered directly from retained primary operator and state-regulator documents. In snapshot study_4bf148084093353fa54602e402d7d4c4 (observed 2026-10-28T14:00:59.670Z, dataset SHA-256 4bf148084093353fa54602e402d7d4c48cbf48aa53080c726fe32c8f307959e2), the denominator covers 404 tracked US brand identities: 213 brands have at least one retained primary-source capture and 56 brands have at least one parsed document-scoped condition clause under method us-conditions-1.1.

1. Field-Level Source Answerability Across the US Inventory

Each brand is counted at most once per condition field. Scoped wording retains document purpose, payment method, first/repeat payout status, currency/coin basis, state scope, and promotional or discretionary qualifiers.

- Operator exclusions: 23 / 404 brands with scoped wording (21 fresh within 7 days; 23 with legacy brand-wide extraction).
- Redemption minimum: 16 / 404 brands with scoped wording (16 fresh within 7 days; 4 with legacy brand-wide extraction).
- Playthrough: 27 / 404 brands with scoped wording (24 fresh within 7 days; 8 with legacy brand-wide extraction).
- Stated processing time: 24 / 404 brands with scoped wording (23 fresh within 7 days; 18 with legacy brand-wide extraction).
- payment_method: 30 / 404 brands with scoped wording (27 fresh within 7 days; 0 with legacy brand-wide extraction).
- fee: 0 / 404 brands with scoped wording (0 fresh within 7 days; 0 with legacy brand-wide extraction).
- Redemption cap: 12 / 404 brands with scoped wording (11 fresh within 7 days; 10 with legacy brand-wide extraction).
- Expiry: 22 / 404 brands with scoped wording (20 fresh within 7 days; 95 with legacy brand-wide extraction).

2. Methodological Boundaries & Non-Inference Rules

1. Denominator: every brand identity currently in the Casimo US registry; a convenience inventory, not a representative sample of all casinos.

2. A field means literal retained source wording, not a verified condition for every promotion, account, method or state. Multiple clauses do not multiply a brand.
3. Fresh means observed within seven days at this study snapshot. Blocked/unavailable sources retain their last good evidence; a missing extraction is not proof of a missing restriction.
4. Deterministic parser coverage is limited to supported English patterns. Quotes and scopes must be checked in the original document. Brand-wide legacy fields and scoped records are different columns.
5. This is an original Casimo source-answerability audit, not a payout benchmark, player survey, legal ranking or casino quality score.
